

FRÄNKISCHE

We have often been ahead of our time with the alpex system.
Just like we are now with the alpex wall connection.

MARKET INNOVATION:
Mounting plate made of glass fibre reinforced plastic

Manufactured in-house from regrind – torsion-resistant like metal

Ideal installation depth for different insulation thicknesses

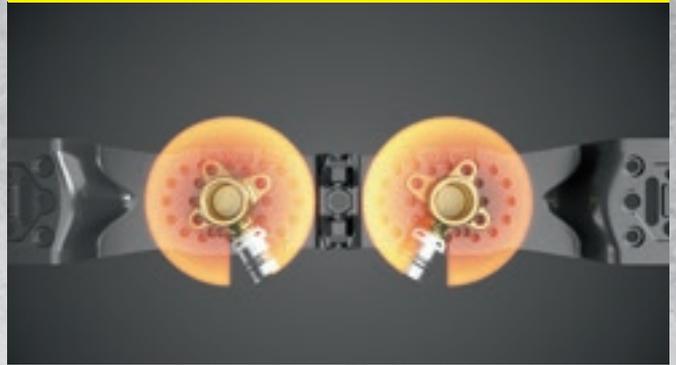

Please go to www.fraenkische.com/en/alpex-wall-connection for the installation video on the new alpex wall connection and further information.

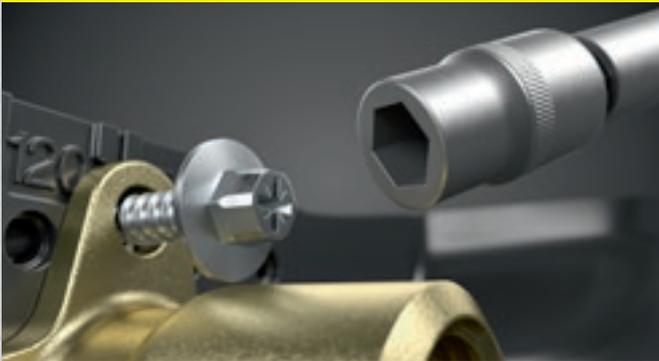

Easy installation thanks to large and clear labelling

360° fixing possibility for flexible positioning of the wall mount elbows

Unique multi-purpose bolt with three fixing options: wrench width 6, Z2 cross recess and 1/4" bit holder

Two in one – alpex sealing for noise separation and as sealing sleeve for the clear separation of trades

Complete flexibility thanks to the integrated Siphon-Fix

Comprehensive alpex wall connection range
