

## Our Environmental Policy

The Environmental Policy is the guideline for FRÄNKISCHE Industrial Pipes including all its subsidiaries and the supporting central divisions of FRÄNKISCHE Rohrwerke Gebr. Kirchner GmbH & Co. KG.

**In addition to achieving customer satisfaction, delivering optimum quality and protecting our employees from work-related accidents, we put first priority on environmental protection.**

- We consider it our duty to continuously improve our processes which is ensured by periodically establishing environmental goals, the measurement of the environmental goals and their implementation through environmental programmes.
- We have always strived to comply with environmental laws and regulations and to satisfy all statutory requirements and approval conditions as well as requirements agreed upon with customers.
- We will reduce our impact on the environment by using resources sparingly and by using low emission and low waste manufacturing technologies and will periodically monitor and measure our impact on the environment.
- We will always seek to promote good communication with our customers, suppliers, government agencies and employees to constantly improve our environmental performance.
- We have long recognised the great importance of training and motivating our employees to constantly improve our processes.
- We take preventive measures to reduce the amount of unwanted emissions associated with possible machine failures.
- Our corrective and preventive measures and our internal audit procedure incorporate our environmental goals and accordingly formulated environment programmes to ensure implementation, suitability, effectiveness and efficiency of our Environmental Management System (EMS) and compliance with environmental laws and regulations.
