

Extended service life of wind turbines

Our FIPSYSTEMS® cable protection systems are specially developed to protect sensitive cabling and cables from extreme loads. The result? An extended service life for your wind turbines and the certainty that you meet the highest fire protection requirements.

Our advantages at a glance:

- Robust yet flexible: Our cable protection systems are designed to withstand extreme loads and at the same time are flexible enough to meet the requirements of wind turbines.
- UV and weather-resistant for up to 40 years: FIPSYSTEMS® defy the elements and provide long-term protection. So you can rely on continuous energy generation.
- Corrosion and abrasion resistant: Our products are designed to withstand the most adverse conditions, extending the life of your systems.
- Easy retrofit installations: We know that flexibility is important. That's why our products allow for retrofitting to keep your systems up to date.
- Matching range of accessories: We offer a comprehensive range of accessories to ensure you get all the components you need for your wind turbines.
